FORTHCOMING ISSUES

<i>Issue</i>	<i>Expected release date</i>
March 2006	28 February 2006
April 2006	31 March 2006
May 2006	28 April 2006
June 2006	31 May 2006
July 2006	30 June 2006
August 2006	31 July 2006

IN THIS ISSUE

This is the final long time series issue of the Australian Economic Indicators. Data cubes containing published ABS data are now available for free from the ABS web site.

The format of the February issue of *Australian Economic Indicators* differs from that used for the other months of the year. The February issue contains, for most series, a longer time span of annual, quarterly or monthly data. It is intended as historical compendium for use in analysis requiring longer time series and is designed to be used in conjunction with statistical updates for most recent periods contained in each regular edition of *Australian Economic Indicators*. To accommodate these changes without significantly increasing the size of the publication, the February issue has a graphical summary but does not include percentage change data within tables, analytical commentaries, feature articles or technical notes.

Where available, the statistics in the February issue are presented as time series for the last twenty-two years of annual data, the last forty observations of quarterly data and the last sixty observations of monthly data. Quarterly and monthly data for most series, and annual data for a limited number of series, are available from the ABS for earlier periods than that shown in this publication. Many series can be obtained on electronic media. Inquiries should be directed to the *Sales and Inquiries* contact telephone numbers given on the back cover.

Dennis Trewin
Australian Statistician

GRAPHICAL SUMMARY

1 INTERNATIONAL ECONOMIC GROWTH, GDP Trend— Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0 and Organisation for Economic Co-operation and Development

2 GDP, Chain volume measure—Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

3 CONTRIBUTION TO GROWTH IN GDP, Chain volume measure, Trend

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

4 IMPORTS AND EXPORTS OF GOODS & SERVICES, Chain volume measures, Trend—
Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

5 EMPLOYMENT, Trend—Monthly % change

Source: Labour Force, Australia, cat. no. 6202.0

6 UNEMPLOYMENT RATE, Trend

Source: Labour Force, Australia, cat. no. 6202.0

7 FEMALE PARTICIPATION RATE, Trend

Source: Labour Force, Australia, cat. no. 6202.0

8 MALE PARTICIPATION RATE, Trend

Source: Labour Force, Australia, cat. no. 6202.0

9 HOUSEHOLD FINAL CONSUMPTION EXPENDITURE, Chain volume measure—
Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

10 GOVERNMENT FINAL CONSUMPTION EXPENDITURE,
(Excluding defence) Chain volume measure— Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

11 RETAIL TURNOVER, Chain volume measures (reference year 2003-2004)—
Trend, Percent change from previous quarter

Source: Retail Trade, Australia, cat. no. 8501.0

12 SALES OF MOTOR VEHICLES, Number per month

Source: Sales of New Motor Vehicles, Australia (Electronic Publication), cat. no. 9314.0

13 TOTAL GROSS FIXED CAPITAL FORMATION, Chain volume measure—Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

14 PRIVATE GROSS FIXED CAPITAL FORMATION, Chain volume measure—Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

15 PRIVATE GFCF: SELECTED COMPONENTS, Chain volume measure—Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

16 VALUE OF RESIDENTIAL BUILDING APPROVALS,
Trend, Quarterly % change

Source: Building Approvals, Australia, cat. no. 8731.0

17 CONSUMER PRICE INDEX, Quarterly % change

Source: Consumer Price Index, Australia, cat. no. 6401.0

18 DOMESTIC FINAL DEMAND CHAIN PRICE INDEX, Quarterly % change

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

19 STAGE OF PRODUCTION INDEXES, Quarterly % change

Source: Producer Price Indexes, Australia, cat. no. 6427.0

20 EXPORT AND IMPORT PRICE INDEXES, Quarterly % change

Source: International Trade Price Indexes, Australia, cat. no. 6457.0

21 WAGES SHARE OF TOTAL FACTOR INCOME, PERCENTAGE SHARE OF GDP (at factor cost)—Trend

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0

22 PROFIT (a) SHARE OF TOTAL FACTOR INCOME,
PERCENTAGE SHARE OF GDP (at factor cost)— Trend

23 HOUSEHOLD SAVING RATIO, Trend

24 GDP AND REAL GROSS DOMESTIC INCOME, Chain volume measure, Trend—
Quarterly % change

(a) Trend data used instead of seasonally adjusted.

(b) Sales is defined as gross non-farm product plus imports of goods and services less changes in private non-farm inventories.

(c) Corporate gross operating surplus include private corporate trading enterprises plus financial enterprises less imputed bank service charge. GNPfc = Gross non-farm product at factor cost.

(d) Interest paid component contains original data.

(e) By convention, zero productivity growth is assumed for industries in the non-market sector, mainly government and some service industries. Therefore, a better indicator of productivity change is provided by the series showing market sector constant price gross product per hour worked.

(a) The estimates for goods and services are not necessarily consistent with the corresponding monthly estimates, shown in tables 2.4 to 2.7 obtained from *International Trade in Goods and Services, Australia*, (cat. no. 5368.0) issued monthly, due to data revisions to the original monthly data not feeding into the quarterly original series until the next quarterly release of *Balance of Payments and International Investment Position, Australia*, (cat. no. 5302.0).

(b) In addition to the differences outlined in footnote (a), the quarterly seasonally adjusted estimates for goods and services are not necessarily consistent with corresponding monthly seasonally adjusted estimates, shown in table 2.4 due to the independent seasonal adjustment of the quarterly and monthly data.

(a) For all time periods, estimates for sugar, sugar preparations and honey are included in Other non-rural.

(b) The estimates for goods and services are not necessarily consistent with the corresponding quarterly estimates, shown in table 2.1 obtained from *Balance of Payments and International Investment Position, Australia*, (cat. no. 5302.0) due to data revisions to the original monthly data not feeding into the quarterly original series until the next quarterly release of *Balance of Payments and International Investment Position, Australia*, (cat. no. 5302.0).(c) In addition to the differences outlined in footnote (b), the monthly seasonally adjusted estimates for goods and services are not necessarily consistent with the corresponding quarterly seasonally adjusted estimates, shown in table 2.1 obtained from *Balance of Payments and International Investment Position, Australia*, (cat. no. 5302.0), because of the independent seasonal adjustment of the monthly and quarterly data.Source: *International Trade in Goods and Services, Australia*, cat. no. 5368.0.

(a) The level of quarterly GDP used in the annualised ratios will be revised in the next issue of *Australian National Accounts: National Income, Expenditure and Product* (cat. no. 5206.0) as a result of the incorporation of the latest annual benchmarks. Therefore, annualised ratios using quarterly GDP have been suppressed. Refer to page 5 of the September 2005 issue of *Balance of Payments and International Investment Position, Australia*, (cat. no. 5302.0) for more information.

(b) Derived from current price original data. The net international investment position ratios are derived from the net foreign liabilities at the end of the period and GDP for the year ended with that period. Other ratios use only data for the year ended with the period shown.

(c) For the latest reference period, GDP for the year ended with the previous quarter is used.

Source: *Balance of Payments and International Investment Position, Australia*, cat. no. 5302.0.

- (a) The exports and imports data presented in this table differ from those in tables 2.1 to 2.5 because they are recorded on an international trade basis rather than a balance of payments basis and are compiled from a different edition of the data.
- (b) The ten member nations of ASEAN are Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand and Viet Nam.
- (c) The countries included in the European Union (EU) changed in 2004. The change is treated as if it happened at the end of the June quarter 2004. Transactions for the EU for 2004 are the sum of transactions for EU15 for the March quarter 2004 and June quarter 2004, and transactions for EU25 for September quarter 2004 and December quarter 2004. The twenty five member states of the EU are Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Republic of Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden and United Kingdom. Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovak Republic and Slovenia are included from July 2004.

(a) The merchandise trade shares relates to data in table 2.12.

(b) The ten member nations of ASEAN are Brunei, Cambodia, Indonesia, Laos, Malaysia Myanmar, Philippines, Singapore, Thailand and Viet Nam.

(c) The countries included in the European Union (EU) changed in 2004. The change is treated as if it happened at the end of the June quarter 2004. Transactions for the EU for 2004 are the sum of transactions for EU15 for the March quarter 2004 and June quarter 2004, and transactions for EU25 for September quarter 2004 and December quarter 2004. The twenty five member states of the EU are Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Republic of Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden and United Kingdom. Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovak Republic and Slovenia are included from July 2004..

(a) The exports and imports data presented in this table differ from those in Tables 2.1 to 2.5 because they are recorded by a foreign trade basis rather than a balance of payments basis and are compiled from a different edition of the data.

(b) The ten member nations of ASEAN are Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand and Viet Nam.

- (a) The exports and imports data presented in this table differ from those in Tables 2.1 to 2.5 because they are recorded by a foreign trade basis rather than a balance of payments basis and are compiled from a different edition of the data.
- (b) The countries included in the European Union (EU) changed in 2004. The change is treated as if it happened at the end of the June quarter 2004. Transactions for the EU for 2004 are the sum of transactions for EU15 for the March quarter 2004 and June quarter 2004, and transactions for EU25 for September quarter 2004 and December quarter 2004.
- (c) The twenty five member states of the EU are Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Republic of Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden and United Kingdom.
- (d) Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovak Republic and Slovenia are included from July 2004.

(a) The merchandise trade share relate to data in table 2.16.

(b) The countries included in the European Union (EU) changed in 2004. The change is treated as if it happened at the end of the June quarter 2004. Transactions for the EU for 2004 are the sum of transactions for EU15 for the March quarter 2004 and June quarter 2004, and transactions for EU25 for September quarter 2004 and December quarter 2004.

(c) The twenty five member states of the EU are Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Republic of Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden and United Kingdom.

(d) Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovak Republic and Slovenia are included from July 2004.

(a) The indexes in Table 7.4 combine ordinary time and overtime hourly rates and therefore include the effect of any changes in overtime penalty rates but are not affected by changes in penalty payments (which fluctuate depending on the number of hours paid at penalty rates) and allowances (which fluctuate according to how much work is performed under special work conditions e.g. height, dirt and/or heat allowances).

(a) Average non-farm wages, salaries and supplements per wage and salary earner. Seasonally adjusted data.

(b) Base for index: 1986–87 = 100.0.

(c) Deflated by the Gross National Expenditure deflator.

(d) Non-farm wages, salaries and supplements, plus payroll tax less employment subsidies plus fringe benefits tax per hours worked by non-farm wage and salary earners.

(e) Ratio of derived private non-farm corporate wages, salaries and supplements plus payroll tax less employment subsidies, plus fringe benefits tax paid by the private non-farm corporate sector to derived private non-farm corporate sector gross product at factor cost plus payroll tax less employment subsidies plus fringe benefits tax.

(f) Nominal unit labour costs (see footnote (g)) deflated by the derived implicit price deflator for gross non-farm product.

(g) Ratio of nominal hourly labour costs to average hourly labour productivity (real gross non-farm product per hour worked by all employed persons).

(a) Excludes Commonwealth and State Government and interbank deposits but includes deposits of the non-bank sector with the Reserve Bank.

(b) Currency plus bank deposits (including certificate of deposit with trading banks) of the private non-bank sector.

(c) Borrowings (other than from banks and related corporations) by permanent building societies, credit co-operatives, finance companies, authorised money market dealers, pastoral finance companies, money market corporations, general financiers and cash management trusts; less borrowings by authorised money market dealers from those non-bank intermediaries. Breaks occur from time to time due to changes in number of reporting corporations.

(d) M3 plus borrowing from private sector by non-bank financial intermediaries less the latter's holding of currency and bank deposits.

(e) Holdings of notes and coin by private sector, plus deposits of banks with the Reserve Bank and Reserve Bank Liabilities to the private non-bank sector.

(f) Loans and advances of those financial intermediaries whose deposit liabilities are included in broad money.

(g) Bills outstanding under acceptance and endorsement commitments by banks.

(h) Credit is equal to bank bills outstanding plus loans and advances by financial intermediaries whose liabilities are included in broad money.

(a) Rates are for the last trading day of the reference period.

(b) On January 1, 1999 eleven European Union nations launched the euro, a single currency giving control of interest rate and exchange rate policy to the European Central Bank. The euro was immediately available for electronic financial and business transactions, but euro coins and notes will not be issued to the general public until January 2002. The participating nations are Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. Greece adopted the Euro on 1 January 2001 and Britain, Denmark and Sweden chose not to adopt the euro.

(c) May 1970 = 100.0.

(a) Original sales data are provided by the Federal Chamber of Automotive Industries and sourced from VFACTS.

(b) Extreme care should be exercised in using the seasonally adjusted series for the number of new motor vehicle sales in Tasmania, the Northern Territory and the Australian Capital Territory. The highly erratic nature of these data makes reliable estimation of the seasonal pattern very difficult.

Source: Sales of New Motor Vehicles, (Electronic Publication), cat. no. 9314.0.

10 INTERNATIONAL COMPARISONS

TABLES

10.1	Real gross domestic product volume index	146
10.2	Balance on current account : percentage of seasonally adjusted GDP	147
10.3	Balance on merchandise trade	148
10.4	Private consumption expenditure volume index	149
10.5	Private fixed capital investment volume index	150
10.6	Industrial production volume index	151
10.7	Consumer price index : all items	152
10.8	Consumer price index : excluding shelter.	153
10.9	Producer prices index.	154
10.10	Wages index	155
10.11	Employment index	156
10.12	Unemployment rates	157
10.13	M1 plus quasi-money index.	158

NOTES

Consumer price index (CPI). Due to the many differences in the structure of the housing sector in different countries and in the way that housing is treated in their CPIs, a simple comparison of All items (or headline) CPIs is often inappropriate. To provide a better basis for international comparisons, the Fourteenth International Conference of Labour Statisticians adopted a resolution which called for countries to “provide for dissemination at the international level of an index which excludes shelter, in addition to the all-items index.”

Table 10.8 presents indexes for selected countries on a basis consistent with the above resolution and comparable to the Australian series *All groups excluding housing and financial and insurance services*. The series in this table are presented on a reference base consistent with that used for publication of the Australian CPI (i.e. 1989–90 = 100.0) and as such are not directly comparable with those for All items published in table 10.7 (presented on a reference base of 2000 = 100.0).

(a) All groups excluding Housing and Financial and insurance services.

(b) This table replaces the previously published series All groups excluding Housing. See paragraphs 16-18 of the explanatory notes of the Consumer Price Index, Australia, cat. no. 6401.0 for more details.

(c) The series for Singapore has been revised. The Singapore Department of Statistics has advised that it has rebased and reweighted its CPI, which resulted in revisions to the previously published data.

EXPLANATORY NOTES

Explanatory notes in the form found in other ABS publications are not included in *Australian Economic Indicators*. Readers are directed to the explanatory notes contained in related ABS publications.

INTRODUCTION

Australian Economic Indicators presents a statistical summary of the Australian economy, together with international comparisons of selected economic indicators. Except for the special February issue, it also includes commentaries, articles, technical notes, and the Experimental Composite Leading Indicator. *Australian Economic Indicators* has been developed primarily as a reference document, providing a broad basis for economic analysis and research.

The tables contain mainly ABS data, although data from other sources are included. For ABS sourced data, the publication name and catalogue number are included in the footnotes of the tables. If the data are from other sources, the source organisation's name is included in the footnotes.

MOST RECENT DATA

The statistics shown are the latest available as at 13 January 2006.

RELATED PUBLICATIONS

A list of related publications is included in each chapter under the table of contents. These include publications which are the source of the data in the tables and other related publications.

Other useful sources of detailed information are the 'Concepts, Sources and Methods' and classification publications. These are released irregularly, each relating to a specific publication, collection or standard classification. The publications most relevant to *Australian Economic Indicators* include:

- *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, cat. no. 1292.0
- *Classification Manual for Government Financial Statistics, Australia*, cat. no. 5514.0
- *Australian National Accounts: Concepts, Sources and Methods*, cat. no. 5216.0
- *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods*, cat. no. 5331.0
- *Labour Statistics: Concepts, Sources and Methods*, cat. no. 6102.0.55.001
- *Labour Price Index: Concepts, Sources and Methods*, cat. no. 6351.0.55.001
- *Australian Consumer Price Index: Concepts, Sources and Methods*, cat. no. 6461.0.

SEASONALLY ADJUSTED AND TREND ESTIMATES

Series in this publication include original, seasonally adjusted and trend series. Special care should always be taken in interpreting data for the most recent months and quarters. Some of the original and all of the seasonally adjusted and trend series are subject to revision.

SEASONALLY ADJUSTED AND TREND ESTIMATES

It is not uncommon for movements in original time series data and those provided from seasonally adjusted and trend series to differ significantly. Movements in a time series of original data may reflect several factors, including:

- longer-term changes in the item being measured (i.e. trend movements);
- short-term irregular changes;
- regular seasonal influences;
- normal 'trading', 'working' or 'pay' day patterns; and
- systematic holiday effects.

Seasonal adjustment and trend estimates help the user to identify the effect of these influences on the time series. Seasonal adjustment removes the effect of the last three listed influences from the data, leaving only the trend and short-term irregular movements. Trend estimates are then obtained by removing the effects of the short-term irregularities, which in many series can be a major contributor to movements in the original data. By comparing the historical trend series with the seasonally adjusted series, the user can identify the short-term irregularities which have influenced the original series.

Trend estimates produced by the ABS are based on Henderson Moving Averages, and are therefore subject to revision especially for the latest few months or quarters.

The general methods used in the ABS for making seasonal adjustments are described in *Seasonally Adjusted Indicators, Australia 1983* (1308.0). The method used to estimate trends is described in *Information Paper: A Guide to Smoothing Time Series — Estimates of Trend* (Cat. no. 1316.0).

Concurrent seasonal adjustment and trend estimates

The ABS has introduced the use of concurrent seasonal adjustment to derive the combined adjustment factors for the Retail Series. This means that data from the current month are used in estimating seasonal and trading day factors for the current and previous months. Concurrent adjustment can result in revisions each month to estimates for earlier periods. However, in most instances, the only noticeable revisions will be to the combined adjustment factors for the current month, the previous month and the same month a year ago. As a result of the concurrent seasonal adjustment the trend estimates are also concurrently estimated.

CHAIN VOLUME MEASURES

The chain volume measures appearing in this publication are annually-reweighted chain Laspeyres indexes referenced to the current price values in a chosen reference year (i.e. the year when the quarterly chain volume measures sum to the current price annual values). Chain Laspeyres volume measures are compiled by linking together (compounding) movements in volumes, calculated using the average prices of the previous financial year, and applying the compounded movements to the current price

CHAIN VOLUME MEASURES

continued

estimates of the reference year. Quarterly chain volume estimates are benchmarked to annual chain volume estimates, so that the quarterly estimates for a financial year sum to the corresponding annual estimate.

Chain volume measures are not generally additive. In other words, in general, component chain volume measures do not sum to a total in the way original current price components do. In order to minimise the impact of this property, the ABS uses the latest base year as the reference year (i.e. the year prior to the latest complete financial year). By adopting this approach, non-additivity does not exist for the quarters following the reference year (currently 2003–04) and is relatively small for the quarters in the reference year and the quarters immediately preceding it. The latest base year and the reference year will be advanced one year with the release of the June quarter Australian National Accounts (*Australian Economic Indicators*, October issue). A change in reference year changes levels but not growth rates, although some revision to recent growth rates can be expected because of the introduction of a more recent base year (and revisions to the current price estimates underlying the chain volume measures).

OTHER USAGES

Columns in bold in the tables indicate a total. Columns usually sum from the left, with the total appearing on the right. A major exception is the balance of payments and international investment position data in Chapter 2. These data sum from the right with the total appearing on the left – in keeping with the international standard for these statistics. Some tables include subtotal columns and columns which need to be subtracted to obtain the total. Where this is not clear a footnote explains the relationship between the columns.

Columns in italics indicate that seasonally adjusted or trend estimates are not available for that column, and original data are provided instead.

Yearly periods shown as, e.g. 2004–05, refer to the fiscal year ended 30 June 2005.

Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Percentage changes may not be exactly comparable to tabulated source series due to rounding of the source series, the percentage change series or both.

METRIC PREFIXES

Deca (da)	= ten
Hecto (h)	= hundred
Kilo (k)	= thousand
Mega (M)	= million
